

Black Hills Corporation ? AFPI POV

My POV Library ?

Black Hills Corporation

Utilities, Electric & Natural Gas Distribution (8-state regulated)

Revenue: ~\$2.9B (Corp) | Employees: ~2,867 | HQ: Rapid City, SD, USA

Current Salesforce Products: Salesforce Industries / Energy & Utilities Cloud (1,510 licenses), Sales Cloud, Marketing Cloud (ExactTarget, Pardot, Datorama), MuleSoft (471 licenses), Agentforce for Field Service (1,500-license deal in Stage 02), ESRI GIS Pilot on E&U Cloud, Signature Success (Stage 04)

Current Non-Salesforce Systems: Legacy CIS (Work Order to Bill target), ESRI GIS, AMI meter platform [field verify with the CIO's office]

Relevant Open Opps: E&U Cloud + Industry Renewal (\$1.79M) | Agentforce for Field Service 1,500 licenses (\$1.28M) | MuleSoft Integration #BarryBigBet (\$850K) | MuleSoft Renewal 471 (\$735K) | Signature Success Core (\$217K) | Agentforce Supply Chain (\$200K) | MC ExactTarget Renewal (\$196K) | Commerce Cloud new website (\$80K) | Flex Credits (\$50K) | Work Order to Bill Target (\$50K) | CleanEnergy Project RFP (\$45K) | AF for Sales (\$37.5K) | ESRI Pilot E&U (\$36K)

AFPI AE: Charlie Stuard

Sales Motion: Co-Sell with Agentforce Operations

Propensity to Buy: 86/100 ? T1 Pursue

Category

Score

Salesforce footprint & open pipe (~\$5.7M across 20 opps)

14/15

Vertical fit & process complexity (regulated multi-state utility)

14/15

Executive AI mandate (AF4FS 1,500-license + Supply Chain + AF for Sales all live)

13/15

Compliance / regulatory pressure (FERC + 8 state PUCs + PHMSA + NERC CIP)

13/15

Data readiness (Field Service + ESRI GIS + MuleSoft integration = event-log gold)

9/10

Top 5 Process Intelligence Use Cases to be Mined

1. Meter-to-Cash "Work Order to Bill" ? Prove the Existing Opp Before It Closes. There is a live "Work Order to Bill Target" opp already on the account ? this is literally the AFPI wedge for utilities named in Black Hills' own Salesforce pipeline. Mine the actual event log across legacy CIS + AMI + WMS + E&U Cloud to distinguish repeatable billing-exception patterns (estimated bills, move-in/out cycles, high-usage disputes) from true one-offs, then route the top three variants to Agentforce Operations. Metric moved: DSO, billing rework hours, cost-to-serve per meter. Engage Marne Jones (SVP, Customer Solutions & External Affairs) or the SVP Utility Operations.

2. Field Service Dispatch ? De-Risk the \$1.28M Agentforce for Field Service Deal. The 1,500-license AF4FS opp is in Stage 02 (Determining Problem/Impact/Ideal). AFPI's fastest wedge is to mine the actual Field Service event log ? dispatch to close, technician utilization, first-time-fix, mutual-aid mobilization ? before Agentforce rollout. That turns the AF4FS conversation from feature-buying to outcome-buying and pulls the deal forward one stage. Metric moved: bay utilization, first-time-fix, parts-fill-rate. Engage Todd Jacobs (COO, Utilities) or the VP Electric Operations.

3. Storm Response & Multi-State Restoration Orchestration. Black Hills serves 1.3M+ customers across South Dakota, Wyoming, Montana, Colorado, Kansas, Nebraska, Iowa, and Arkansas ? every state exposes different weather patterns (wildfires in CO, blizzards in SD/WY, tornadoes in KS/NE). AFPI mines the outage-restoration event log across OMS, GIS/ESRI, WFM, and CIS to quantify what a 10% faster average restoration is worth in avoided customer-hours-lost, plus expose which mutual-aid onboarding paths keep stalling. Same pattern that CenterPoint Energy is

running post-Beryl. Metric moved: SAIDI/SAIFI, mutual-aid ramp-up time. Engage Todd Jacobs (COO, Utilities).

4. Regulatory Rate-Case & Prudency-Filing Evidence Automation. With eight state PUCs (SD, WY, MT, CO, KS, NE, IA, AR) plus FERC, PHMSA, and NERC CIP filings running in near-perpetual cycles, Black Hills' regulatory team spends thousands of hours pulling logs and building narratives. AFPI's Compliance Center wedge produces continuously-updated, audit-grade process evidence for every regulated workflow (outage response, capital deployment, safety inspections, cyber-incident handling). Pairs directly with the \$217K Signature Success Core already in Stage 04. Metric moved: rate-case prep cycle time, prudency approval rate. Engage Brian Iverson (SVP & Chief Regulatory Officer).

5. Clean-Energy Capital-Project Stage-Gating (RFP & Ready Path). The active \$45K CleanEnergy Project RFP and the ESRI Pilot on E&U Cloud both signal a major clean-energy transition ? solar/wind interconnection, gas-decarbonization, hydrogen pilots. Capital-project intake spans dozens of hand-offs (engineering, environmental permitting, IRP filing, PUC approval, procurement, construction, commissioning). AFPI mines the intake-to-commissioning process to expose which stage-gates stall projects and where re-permitting rework happens. Metric moved: project-approval cycle time and re-work-rate on regulatory filings. Engage Kimberly Nooney (SVP & CFO) or the SVP Corporate Development.
