

Stellantis Financial Services, Inc. ? AFPI POV

My POV Library ?

Stellantis Financial Services, Inc.

Financial Services, Captive Auto Finance

Revenue: \$229M | Employees: 550 | HQ: Atlanta, GA

Current Salesforce Products: Sales Cloud, Service Cloud, Experience Cloud (Customer & Partner Portals), MuleSoft, Tableau, CRM Analytics, Platform

Current Non-Salesforce Systems: Informatica MDM, Regrello

Relevant Open Opps: Stellantis Financial Services -Apromore (\$550k) | Stellantis Financial Data Mining Apromore (\$200k) | INFA MDM Data Fabric (\$800k) | SFA/Portal Renewal (\$5.8M) | MuleSoft Renewal (\$2.7M) | SFS Loan Origination PH2 (\$1.0M) | SFS Regrello (\$500k) | Adaptive Agent for Sales (\$250k)

AFPI AE: Charlie Stuard

Sales Motion: Sell Integrated with Salesforce Product (Service Cloud + MuleSoft + Informatica MDM)

Propensity to Buy: 92/100 ? T1 Pursue

Category

Score

Active Opportunity Alignment (Apromore opps already live)

20/20

Process Complexity & Pain (loan origination, servicing, collections)

18/20

Data Readiness (MuleSoft + Informatica MDM in flight)

14/15

Buyer Access (SFS is a known Salesforce anchor account)

13/15

Regulatory / Compliance Pressure (CFPB, state DMV, GLBA, FDCPA)

12/15

Top 5 Process Intelligence Use Cases to be Mined

1. Auto Loan Origination ? Time-to-Decision & Dealer Funding Cycle. SFS is standing up a new loan-origination platform (SFS Loan Origination Services PH2, \$1.0M) and Adaptive Agent for Sales ? both create fresh event logs across dealer submission, credit decision, contract booking, and funds disbursement. Dealers churn to competing captives when funding slips past 24 hours, and manual stipulations reviews add rework loops that never show up in KPI dashboards. AFPI mines the origination event stream from MuleSoft-integrated dealer, LOS, and Service Cloud data to expose decisioning bottlenecks, stipulation-driven rework, and dealer variance ? targeting a 30-40% reduction in cycle time and higher captive penetration. Engage the COO / Head of Originations at Stellantis Financial Services .

2. Collections & Delinquency Workflow Optimization. In a rising-delinquency auto-finance market, collections cure rate is the single biggest lever on net charge-offs ? every day earlier a delinquent account is worked converts directly to basis points saved. Current queues, dialer strategies, promise-to-pay follow-ups, and legal-handoff triggers are governed by static rules that no one has time to re-tune against actual behavior. AFPI mines Service Cloud case, dialer, and payment-event logs to reveal which agent paths, contact channels, and treatment sequences drive the fastest cure ? feeding Agentforce to route the right contact to the right agent at the right hour. Metric: 3-5 bps improvement in net loss on portfolio scale. Engage the Head of Collections at Stellantis Financial Services .

3. Dealer Onboarding & Floor Plan Servicing. Bringing a Chrysler/Dodge/Jeep/Ram/Fiat dealer live on SFS floor plan and retail programs is a multi-team dance across credit, compliance, legal, and IT provisioning ? the Experience Cloud Partner Portal (\$529K subscribers on the current SFA renewal, \$5.8M) is the front door but the back-office swivel-chair is invisible. Every week of onboarding delay is lost paper contracts and lost captive share to Ally, GM Financial, and Ford Credit. AFPI mines Partner Portal, MuleSoft, and Service Cloud event logs to expose which onboarding steps stall, why, and by whom ? feeding an Agentforce Operations

agent that auto-nudges the blocking party. Metric: 40% faster dealer time-to-first-contract.

Engage the Head of Dealer Services at Stellantis Financial Services .

4. Customer Servicing & Contact-Center Deflection. The Service Cloud footprint plus \$918K Slack for US and \$250K Adaptive Agent for Sales opp signals an active push toward AI-assisted servicing. Payoff quotes, extension requests, insurance and title issues, and end-of-lease inspections dominate call volume ? and each is a repeatable process with clear event trails.

AFPI mines IVR, case, and payment-event streams to find the top 10 high-volume/high-effort call intents that Agentforce can fully deflect, and quantifies the labor + AHT savings before build.

Metric: 25% call deflection, 15% AHT reduction on retained calls. Engage the Head of Customer Service at Stellantis Financial Services .

5. Regulatory & Compliance Center ? CFPB, GLBA, FDCPA Evidence. Auto captives are under active CFPB scrutiny on servicing, add-on products, repossession practices, and Servicemembers Civil Relief Act ? and Stellantis Financial has publicly disclosed CFPB engagement on servicing practices. Compliance today is spreadsheets, sampling, and audit-response fire drills. AFPI's Compliance Center wedge sits on top of the mined loan-servicing and collections process and produces continuous, defensible evidence that policy-mandated steps were executed on every account ? converting audits from weeks of manual pulls to on-demand dashboards. Metric: 50% reduction in audit-response labor, materially lower regulatory risk exposure. Engage the Chief Compliance Officer at Stellantis Financial Services .
