

JPMorgan Chase & Co. ? AFPI POV

My POV Library ?

JPMorgan Chase & Co.

Financial Services, Banking (Global Universal Bank)

Revenue: ~\$177B (FY24 net revenue) | Employees: ~317,000 | HQ: New York, NY, USA

Current Salesforce Products: Tableau, Analytics Cloud, Service Cloud, Agentforce (Flex Credits purchased Jan 2026), Expert Services / Signature Success

Current Non-Salesforce Systems: Not confirmed [field verify with Naveen / Anish Bhimani org]

Relevant Open Opps: Tableau + Analytics + Platform renewal (\$16.4M) | Expert Services FY27

New Business (\$1.0M) | Tab CTO + Expertise Hours Renewal (\$1.0M)

AFPI AE: Charlie Stuard

Sales Motion: Co-Sell with Agentforce Operations

Propensity to Buy: 88/100 ? T1 Pursue

Category

Score

Vertical fit & process complexity (regulated banking at scale)

12/12

Compliance / regulatory pressure (Basel III, CCAR, Dodd-Frank, OCC)

12/12

Existing Salesforce footprint (Tableau, Analytics, Service, Agentforce)

12/12

Executive AI mandate (FINS CAB, Agentforce Flex Credit purchase)

11/12

Stated intent in Apromore/Regrello (CAB Nov 2025)

11/12

Top 5 Process Intelligence Use Cases to be Mined

1. Consumer Onboarding & KYC/AML Cycle Time. Chase Consumer & Community Banking onboards millions of retail and small-business customers a year through a fragmented KYC/AML workflow that spans branch, digital, and back-office review queues. AFPI mines the actual account-opening event log to expose rework loops, manual escalations, and stalled cases that quietly push regulatory SLAs. The play plugs directly into the existing Agentforce Flex Credit footprint so Chase pays for outcomes, not implementation; the metric it moves is median onboarding cycle time and first-touch-resolution rate. Engage Anish Bhimani (CPO, Global Banking) ? already on the Salesforce FINS CAB and publicly flagged Apromore interest.

2. Commercial & Investment Bank Deal Lifecycle. The end-to-end path from pitch ? mandate ? syndication ? booking spans dozens of internal systems and every desk runs its own variant. AFPI reconstructs the real process from CRM, deal-management, and settlement events to show where mandates leak, where legal review re-queues, and where booking breaks. Value framing against TPL: the process-mining tier reveals the top three revenue-leak paths inside a quarter, well under a single lost mandate. Metric: mandate-to-book cycle time and revenue leakage per stage. Engage Sanoke Viswanathan (CEO, International Consumer Bank / former CAO of CIB) or the CIB COO team.

3. Service Case Deflection for the \$100M+ Service Cloud Estate. JPMC is a Service Cloud RED account with active escalations and sensitive routing (see internal Support Ops thread, Apr 2026). AFPI mines the case-handling event log ? swivel-chair between agents, hold-and-resume, escalation ping-pong ? and hands the highest-frequency broken flows straight to Agentforce for automation. This is the fastest Compliance-Center wedge: same process log surfaces reg-mandated complaint SLAs. Metric: cost-to-serve per case and % cases fully agent-resolved. Engage the Service Cloud CSM already in #jpmorgan-support-csm-collabration .

4. Wholesale Payments & Wire Exception Handling. JPM Payments processes ~\$10T/day; every wire that lands in exception review is a manual cost and a customer-experience risk. AFPI mines the exception queue to distinguish repeatable failure patterns (data quality, sanctions hit, cutoff timing) from true one-offs, then routes the repeatable ones to Agentforce Operations. This is the clearest 2-4 week time-to-value story vs. Celonis ? no PQL specialist, one no-code analyst

inside Payments Ops can pilot. Metric: exception-clear rate per FTE and STP percentage. Engage Takis Georgakopoulos (Global Head of Payments) or his COO.

5. Regulatory Reporting & Compliance Center Wedge. Basel III endgame, CCAR, LCR, and OCC reporting all consume upstream operational data whose lineage is only partly documented. AFPI's Compliance Center lays a process-lineage view over reporting workflows so audit and internal risk see the same picture control functions do ? a defensible answer to "prove the process."

Metric: audit-finding count and reporting close-cycle days. Engage Elena Korablina (Global Controller) or the Chief Data & Analytics Office.
