

WSFS Financial Corporation ? AFPI POV

My POV Library ?

WSFS Financial Corporation

Financial Services, Banking (Regional / Community)

Revenue: ~\$1.4B | Employees: ~2,100 | HQ: Wilmington, DE, USA

Current Salesforce Products: Sales Cloud (SFA), Analytics Cloud, MuleSoft, Platform, Marketing Cloud Engagement, Service Cloud (in-flight)

Current Non-Salesforce Systems: Informatica IDMC / MDM (confirmed via active INFA opp)

Relevant Open Opps: AEH Org Renewal ? MuleSoft + Platform + CRM (\$1.33M) | Sales Cloud + Analytics Renewal (\$2.37M) | Agentforce Operations (\$600K) | CTO Extension (\$778K) | Employee Service + Agentforce (\$239K) | Informatica MDM (\$303K) | Agentforce Pilot (\$150K)

AFPI AE: Charlie Stuard

Sales Motion: Co-Sell with Agentforce Operations

Propensity to Buy AFPI

Score: 86/100 ? T1 Pursue

Category

Score

Active Agentforce / Operations motion in-flight

18/20

Regulated vertical (bank, KYC/AML, BSA)

14/15

Salesforce install base breadth (SFA, MuleSoft, MC, Service, Data Cloud shell)

13/15

Data & MDM readiness (active Informatica IDMC / MDM)

12/15

Recent M&A integration complexity (Bryn Mawr Trust)

12/15

Top 5 Process Intelligence Use Cases to be Mined

1. Customer / Account Onboarding & KYC. WSFS onboards retail, small-business, and wealth clients through overlapping teller, digital, and Cash Connect channels ? with KYC/AML checks, CIP verification, and beneficial-owner reviews stitched across the core, Salesforce, and Informatica MDM. AFPI can mine the end-to-end onboarding event log to expose rework loops, manual document chase, and cycle-time variance between branches and the digital channel, then hand clean, evidenced processes to the Agentforce Operations agent already in-flight (\$600K). Metric moved: time-to-fund and abandonment rate on new accounts. Champion: Rodger Levenson (CEO) sponsor; the digital / retail banking operations lead as day-to-day owner.
2. Loan Origination & Underwriting (Commercial + Small Business). Commercial and SBA loan files traverse relationship managers, underwriting, credit, doc prep, and closing ? a classic hand-off-heavy process where variance and re-work erode NIM in a rising-rate environment. AFPI mines the origination log across the LOS and Salesforce SFA (part of the \$2.37M renewal) to quantify stage-level cycle times, exception paths, and covenant-review rework. That evidence turns the Agentforce Operations pilot into a targeted underwriter-assist agent rather than a generic chatbot. Metric moved: application-to-close cycle time and pull-through rate. Champion: the commercial banking COO or head of credit ops (commercial banking lead).
3. Contact Center & Employee Service (Service + Agentforce). WSFS has an active Employee Service + Agentforce opportunity (\$239K) and an Agentforce Pilot (\$150K). AFPI mines the case-handling event log ? Service Cloud statuses, agent actions, escalations, transfers ? to isolate the top intents by AHT and re-open rate, so the deployed Agentforce agents are pointed at the flows with the biggest handle-time payoff, not the loudest. AFPI Compliance Center adds an audit trail for regulator questions on complaint handling and Reg E disputes. Metric moved: AHT, first-contact resolution, complaint SLA. Champion: the head of customer service / associate experience (customer experience lead).
4. Post-Merger Integration & Data Quality (Bryn Mawr Trust + Cash Connect + Wealth). WSFS has

absorbed Bryn Mawr Trust and runs Cash Connect and a wealth arm ? meaning duplicated customer, party, and account records flow through the active Informatica IDMC / MDM initiative (\$303K). AFPI mines the master-data reconciliation and manual-merge processes to show where MDM rules are firing false positives, where stewards are rubber-stamping, and where the same customer is being serviced twice. Combined with the MuleSoft integration renewal, this becomes the evidence that turns MDM from a cost center into a measurable revenue-per-customer story. Metric moved: single-customer-view coverage, steward hours per 1,000 records. Champion: the head of enterprise data / CIO organization (CIO).

5. BSA / AML Alert Investigation & SAR Filing. As a \$20B+ asset bank operating in Delaware, WSFS is subject to intensive BSA/AML supervision, and alert queues from transaction monitoring generate huge investigator caseloads. AFPI mines the alert-to-disposition process ? enrichment, escalations, L1/L2 hand-offs, SAR narrative drafting ? to expose bottlenecks and disparate reviewer paths, then hand a proven, auditable process to an Agentforce financial-crimes assistant. Compliance Center provides regulators the evidenced control story. Metric moved: alerts per investigator per day, SAR filing timeliness, false-positive rate. Champion: the BSA officer / head of financial crimes (BSA officer); economic buyer sits with the Chief Risk Officer.
